About
GBI

About GBI

- Operating across Asia, Middle East and Europe
- Integrated subsea and terrestrial network
- Diversity of routes linking the East to the West
- 24x7 NOC with backup
- Restorable services using ring within the Gulf
- 40,000+ KM network length
- 60+ engaged Partners & Suppliers
- 99.9% Availability for IP/MPLS Services
- The major Middle East carrier neutral network

Winner of the 2016 Telecom Company of the Year, Best Middle Eastern Wholesale Carrier, and Best Submarine Cable Operator

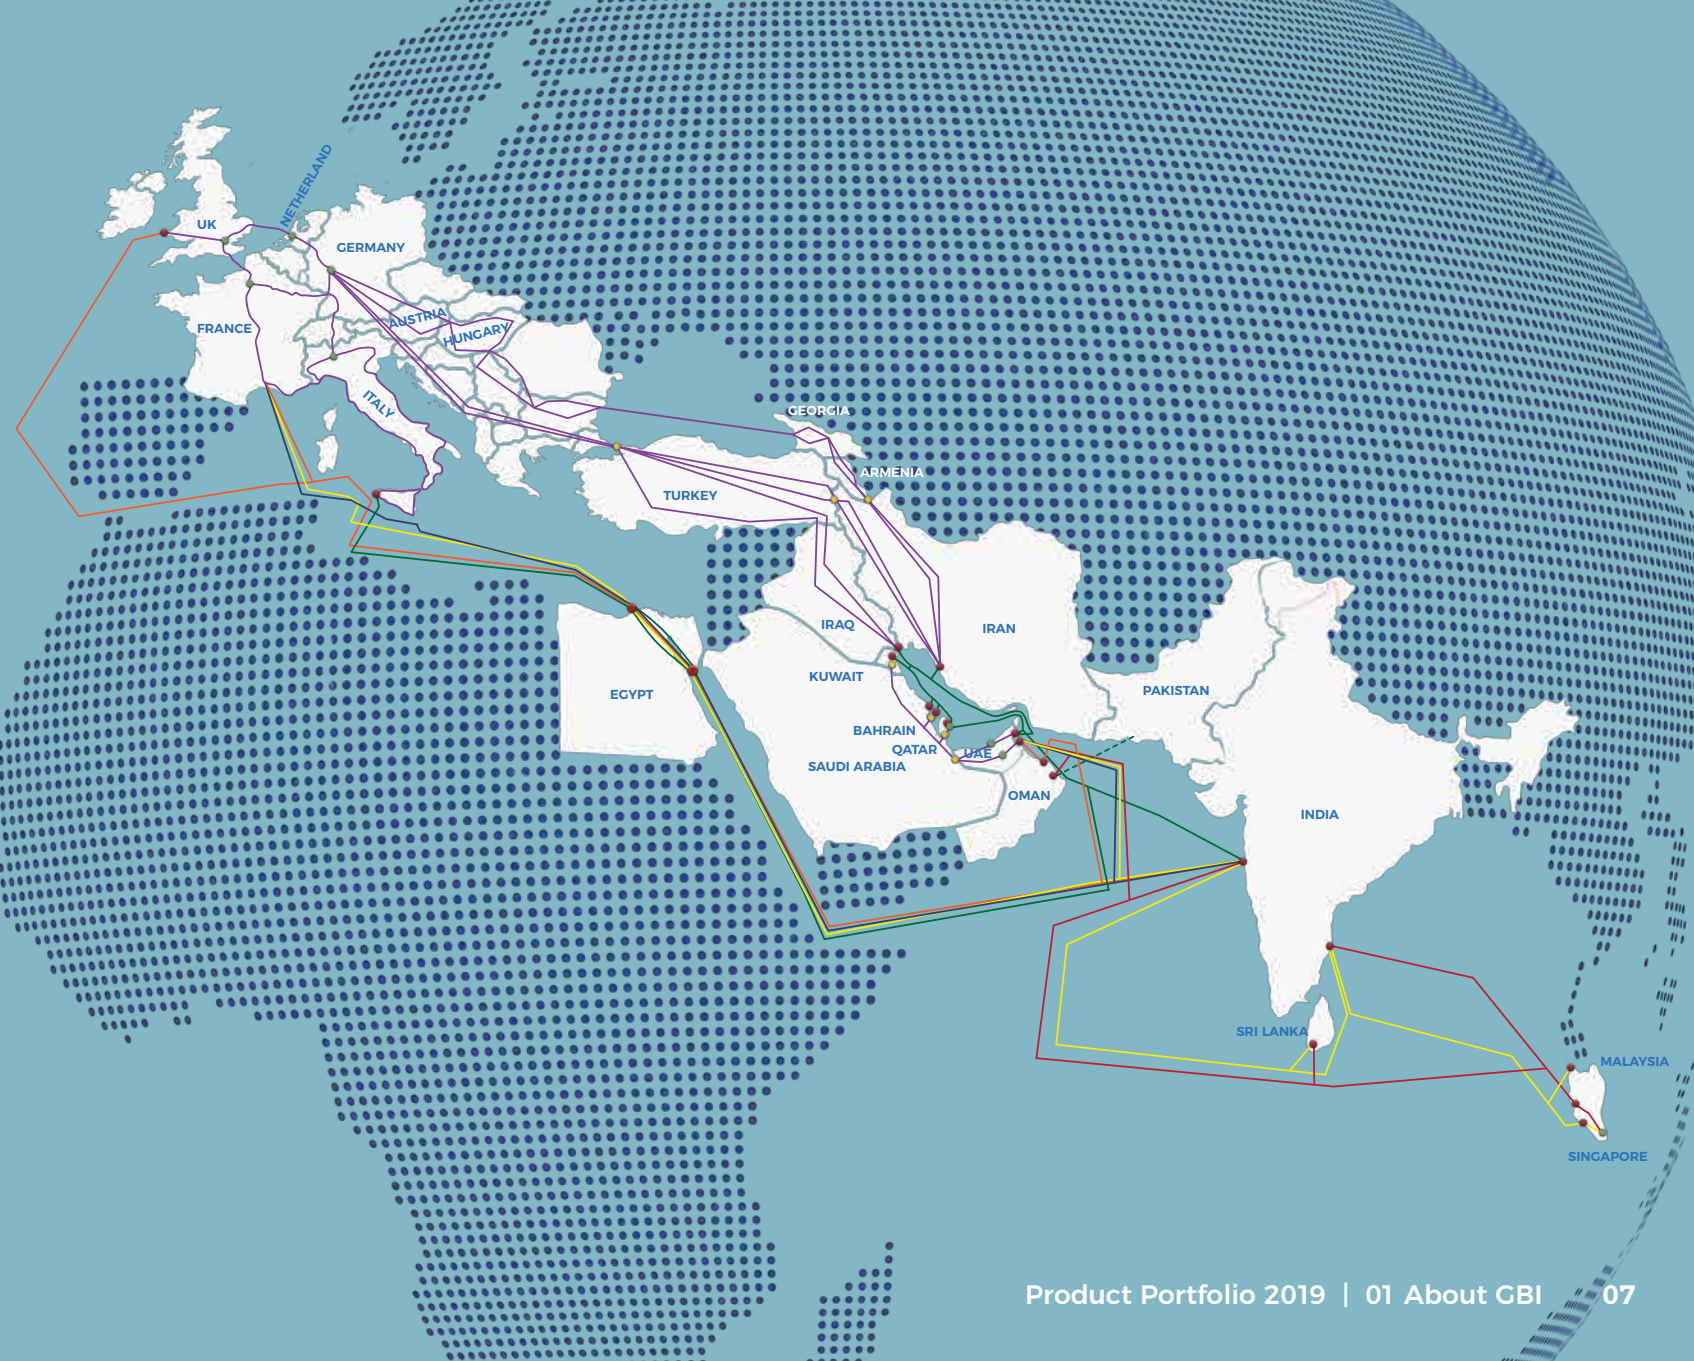

Smart and agile network solutions for Carriers and Enterprise clients

GBI Network

- PoP
- CLS
- Inter Connect point

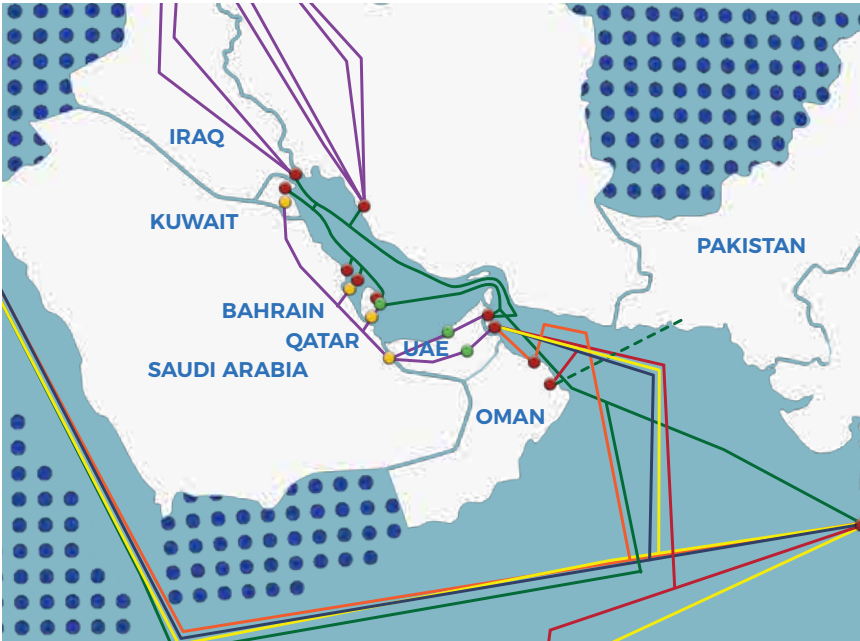

- GBI North Route
- GBI European Network
- GBI GCCIA
- GBICS
- GBI Middle East
- EIG
- SeaMeWe-4
- IMEWE
- BBG

GBI Network in focus

Connecting the east and the west to the heart of the Gulf

Full Protected Gulf Loop

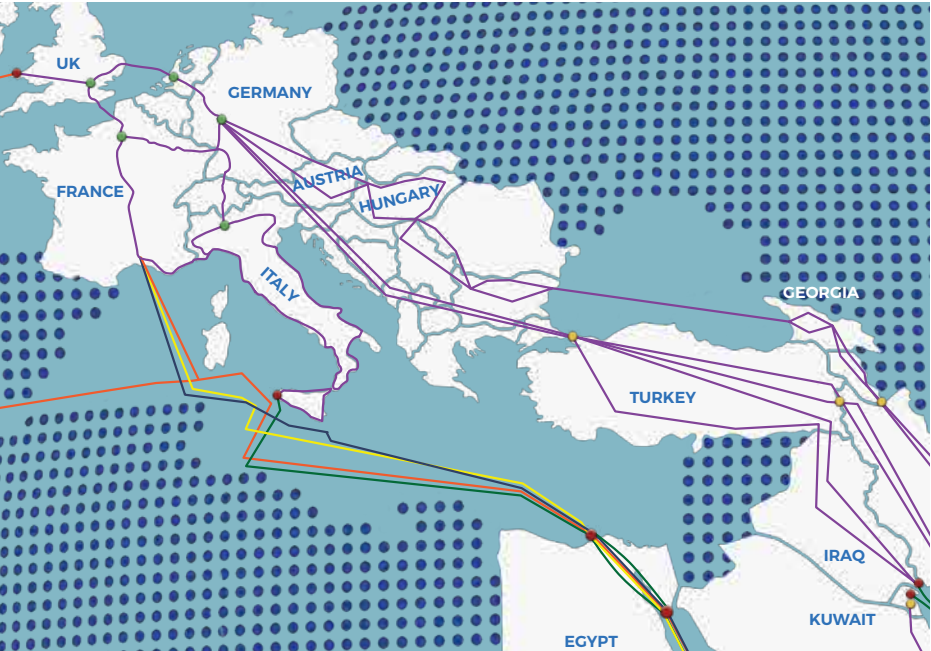

GBI — GCCIA —

The GBI submarine cable system (in green) is the most recent technically available cable system in the Gulf that connects all Gulf countries via a ring topology.

GBI also offers terrestrial protection of the spurs in the gulf loop by using GCCIA cable system.

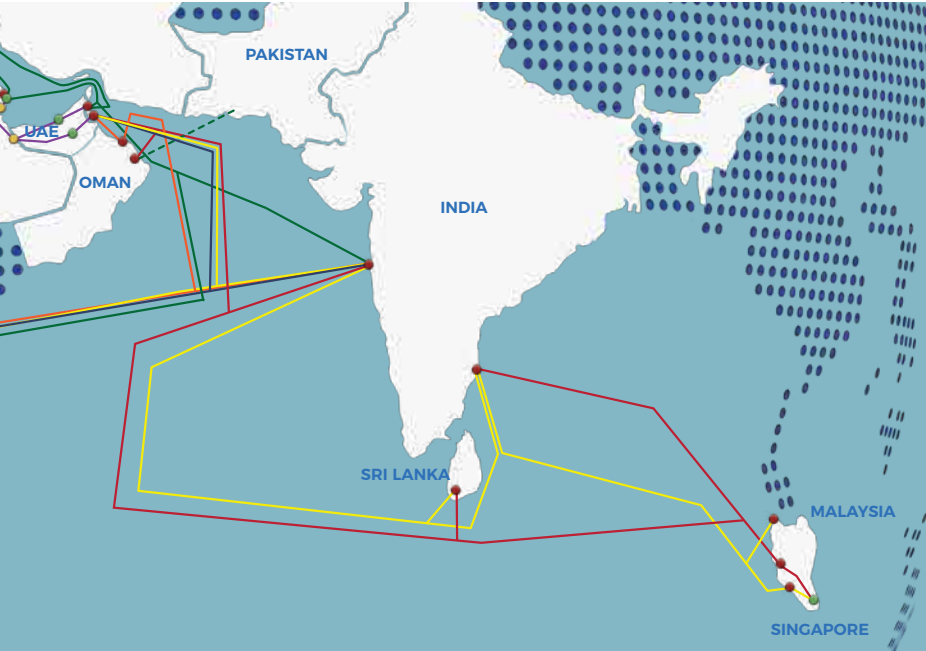

Low Latency North Route

The North Route —

GBI is enjoying a unique position as a major regional carrier who can offer a direct route from Doha and other GCC countries to Europe via a low latency terrestrial North Route. MPLS services into Europe such as Azure ExpressRoute are served using the GBI North Route as the primary method of reaching European based servers.

East Route

Singapore Route — —

GBI leverages on BBG and SMW4 cable systems to have fully protected diverse routes from GCC and Europe to Singapore. Services from Singapore PoP can be extended via GBI North Route to provide low latency connectivity between the East and West while a direct capacity is also in place to connect this PoP to London via standard sea route.

Capacity
IP Transit
Ethernet Services

GBI Services

CAPACITY SERVICES

We own and operate a carrier neutral backbone that offers a full range of SDH (IPLC), EoSDH and DWDM transmission capacity solutions.

IP SERVICES

Connections to the largest IP Exchanges within Europe, Asia and GCC to provide reach to eyeballs in the region.

ETHERNET SERVICES

The GBI Ethernet services portfolio comprises a range of carrier grade connectivity options across Europe, the Middle East, India and Singapore. Customers enjoy ultimate flexibility in choice of routes and latency backed up by a 99.99% availability SLA.

GBI Capacity Services

Capacity Service IPLC/EPL between Middle-East and Europe

CUSTOMER REQUIREMENTS

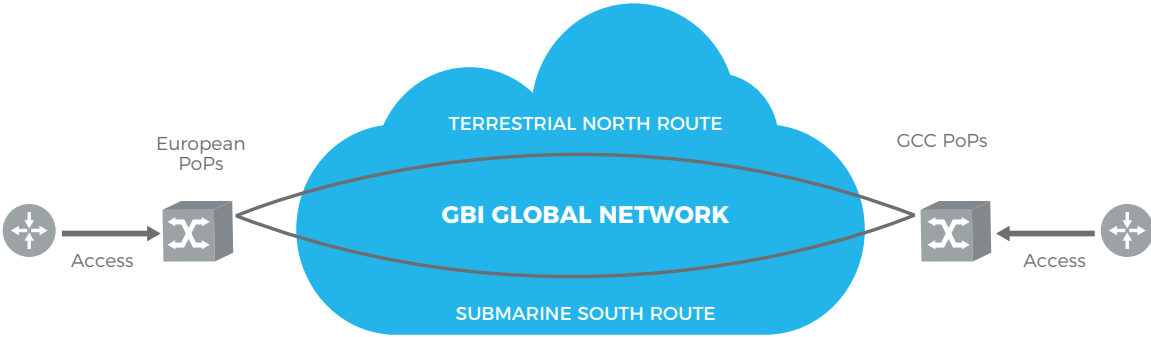

- IPLC and EPL Services from 100MB onwards
- Reach to all GCC countries, PoPs and Datacenters
- Reach to Europe via low latency north route and standard latency south route
- Wavelength from 10G to 100G

GBI SOLUTION BENEFITS

- STM1 to STM64 and 100MB to 100GB
- Ethernet Over SDH
- Access to the main DCs in the GCC
- Leverage different routes to reach Europe

Connect GCC to Europe via diverse routes

The diagram below describes the diverse routes that GBI offers between the GCC and Europe.

GBI Capacity Services

Protection **Plus**
An insurance for your capacity

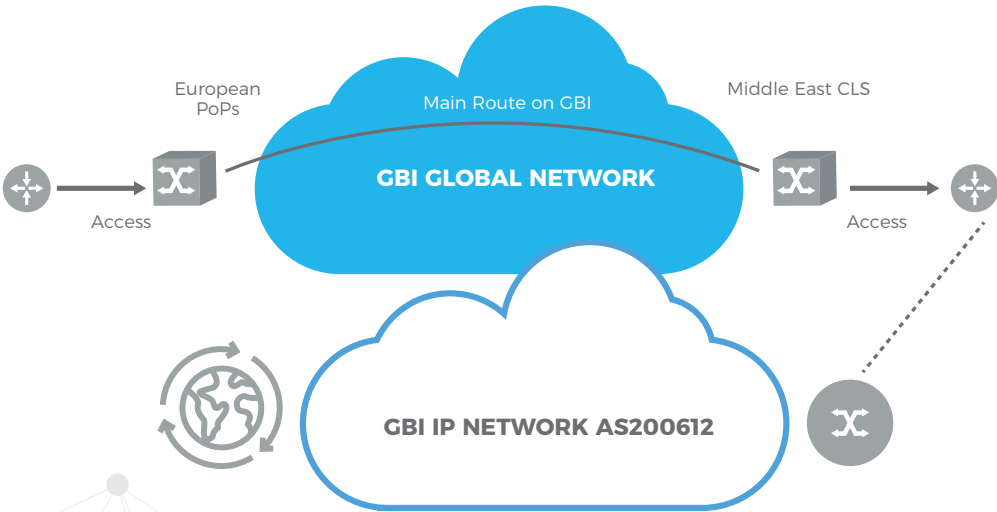

CUSTOMER REQUIREMENTS

- Low network outage
- Value for cost
- High availability of service needed

GBI SOLUTION BENEFITS

- Set up IP port for on-demand activation during capacity failure
- From 1G to multiples of 10G
- Pre-staged setup for quick restoration
- Regional Carrier requires Capacity Service with low cost restoration with rapid turnaround in the form of equivalent IPT Service

With pre-configured IPT connectivity along with your purchased capacity, restoration of your service in the form of IPT can be achieved within minutes

GBI Capacity Services

10G Capacities on BBG Cable Systems

BBG Routes and Landing Stations

Customer Requirements

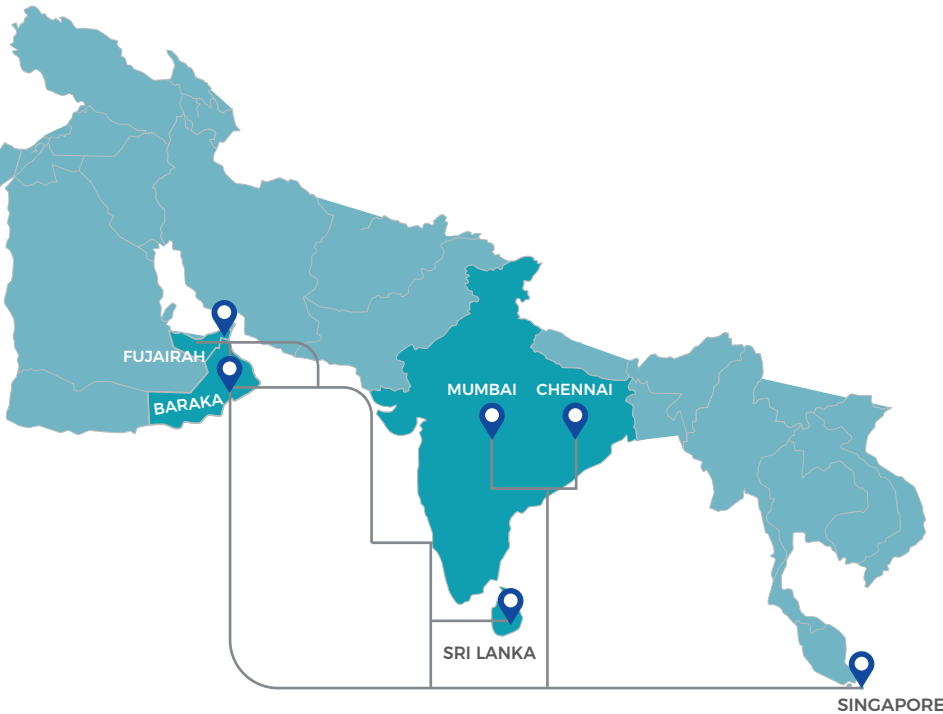

- 10G Wavelength
- Competitive latency from Singapore to major points in Asia and GCC
- Flexible offering for IRU or Lease

GBI Solution Benefits

- 10G Wavelength as STM64, ch-STM64 and 10GE interfaces
- Extendable to GCC countries using GBIC cable system
- Competitive latency and availability

Extendable to GCC via GBIC System

| BBG Routes | | Latency |
|------------|-----|---------|
| A | B | RTD |
| SNG | OMN | 70ms |
| SNG | FUJ | 72ms |
| SNG | MUM | 59ms |
| SNG | CHN | 37ms |
| SLK | MUM | 25ms |
| MUM | OMN | 20ms |
| MUM | FUJ | 22ms |
| FUJ | OMN | 3ms |
| SNG | DOH | 83ms |
| SNG | KUW | 88ms |
| SNG | IRQ | 89ms |
| SNG | KSA | 87ms |
| SNG | BAH | 86ms |

03

**IP Transit
Services**

GBI IPT Services

IP Transit - Premium and Standard

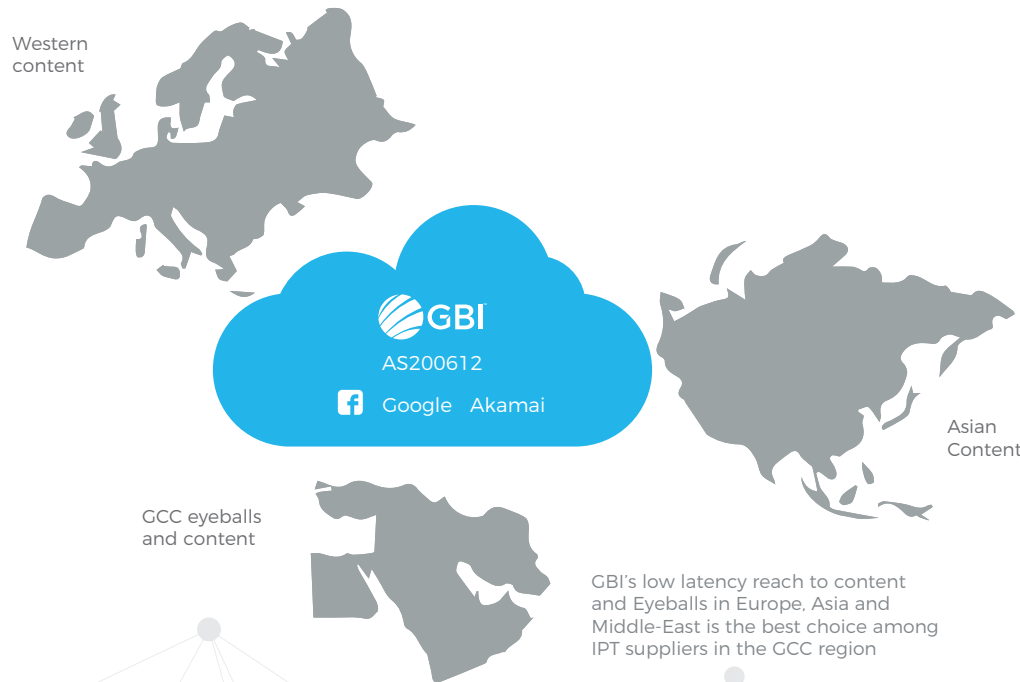

CUSTOMER REQUIREMENTS

- Seeking a reliable and consistent service
- Lower latency to reach the local content
- Reaching to main regional and global contents
- IP tuning and ongoing enhancement

GBI SOLUTION BENEFITS

- 99.99% availability SLA
- 24 x 7 IP NOC
- Impressive latency measured PoP to PoP
- Extensive global and regional peering relationships

Global coverage of GBI IPT Service

GBI IPT Services

Add-on Service: Content Transit Service

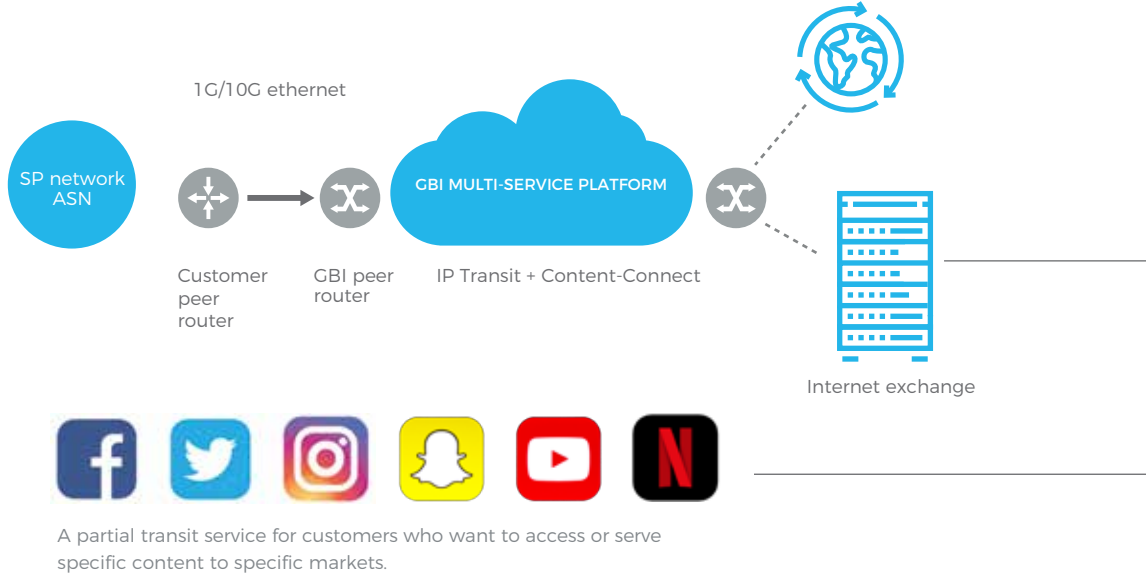

Customized reach to the content of your choice

CUSTOMER REQUIREMENTS

- Requiring a one stop shop service for dedicated access to regionalized content

GBI SOLUTION BENEFITS

- Easy access solution over IP
- Growing list of global and regional content players
- Multiple peering points to Google

04

Ethernet Services

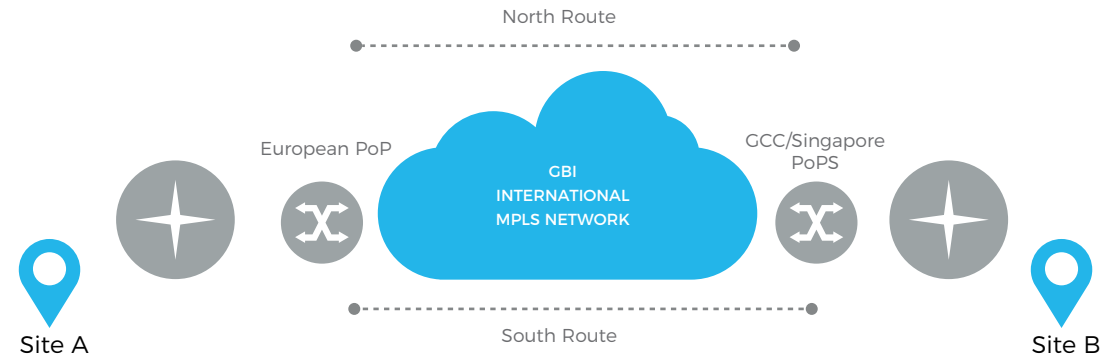

GBI Ethernet Services

Global Ethernet Services

| CUSTOMER REQUIREMENTS |
|--|
| High availability of service |
| Lower initial bandwidth requirement with foreseeable future increase |
| Cost is a key determinant in decision making |
| Low latency reach from GCC/Asia to Europe |
| GBI SOLUTION BENEFITS |
| 10Mbps scalable to 10Gbps |
| Rapid Deployment of services |
| PAYG contract |
| MPLS option for North and South routes |
| Connect Singapore/India to GCC and Europe |

High resilience and low latency ethernet over MPLS, between Europe, GCC and Singapore

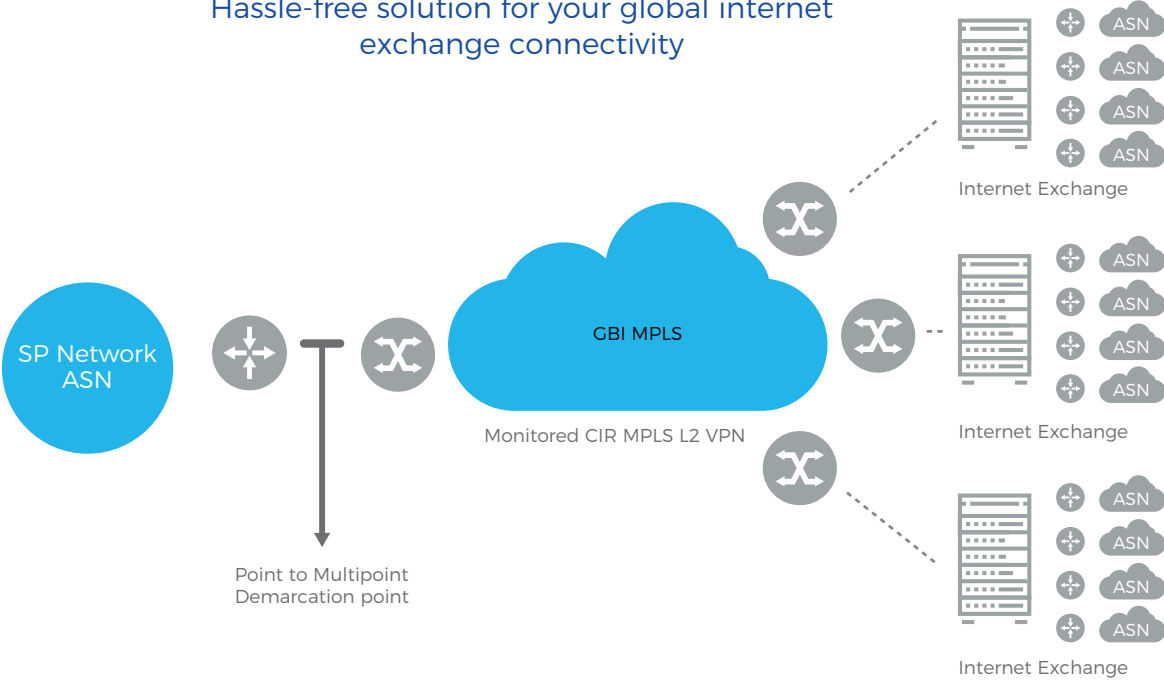

GBI Ethernet Services

IX Connect Service

| CUSTOMER REQUIREMENTS |
|--|
| Improved peering connectivity across the world's largest IXs |
| Cost minimization of global infrastructure costs |
| Agility to balance traffic to different destinations as per local internet use. Flexible connectivity to each IX from 100MB to 100GB |
| Fast Go-to-Market and IX provisioning |
| GBI SOLUTION BENEFITS |
| A single port provision. No deployment or installation required |
| Low cost. Pay only for the CDR you need |
| Single point of contact for Billing, Legal and Technical |
| Flexible bandwidth arrangement between 1G to nx10G to DE-CIX, AMS-IX, LINX, UAE-IX and SH-IX |

Hassle-free solution for your global internet exchange connectivity
